

# ADAPTIVE EVENTS

2022 Event Dates:

Waunakee Triathlon - May 21

Madison Bike + Run - June 11

Middleton Triathlon - August 20

Tri 4 Schools is a local non-profit devoted to empowering kids, schools and communities. Through multi-sport events and training programs, we strive to grow happy, healthy and confident kids while simultaneously supporting schools. Our adaptive events remove barriers to participation and create a custom environment (for example, run + bike + run) so all kids can find success and experience the joy of the finish line!

## HOW DOES IT WORK?

In order to help your child have the best experience, reach out to our Executive Director, and we will set up a short call to learn about your child, as well as answer any of your questions.

Then, after signing up online, we recommend coming to watch an event to help you and your child learn about what to expect on race day. We will work with our race leads to make sure we're ready to welcome your child on race day with open arms!

## WHO PARTICIPATES?

Every child in our community deserves healthy, fun and safe opportunities to be active. Our race courses can be customized to fit your child's needs - including those with IDD (Intellectual and Developmental Disabilities), those in need of physical alternatives, or any child who may require some extra supports.

Our events are open to any child age 3-14.

DETAILS >

## EVENTS & PROGRAMS

We offer a youth races series consisting of two triathlons and one bike + run, in addition to the Training Team Program. However, our adaptive events can be altered to ensure your child's success. Whether it is removing a component, changing the distance, or having a buddy participate alongside them, we're excited to make this a fun experience for your child.
